WELCOME AND INTRODUCTION

1. Welcome and Introduction to BSc (Hons) Social Sciences Degree

Welcome to the BSc (Hons) Social Sciences degree offered at Highlands College and approved by University of Plymouth.

The degree has been written to reflect the special features of Jersey's society.

The course covers: Psychology, Race, Immigration, Criminology, Sociology, Social history, Globalization including the references to small states and Jersey's unique political status. Research methods taught in Stage 1 and Stage 2 will give Students skills to undertake their own research in the final year of the course for dissertations and work-based action research. This Degree provides a broad overview of the institutions of society, theories and perspectives that show how individuals they relate to each other and institutions.

Jobs requiring graduate skills will look favourably on this course, opening doors to a wide range of professions. If a Student wishes to specialise they can tailor their Work based learning in Stage 2, Work based action research and Dissertation in Stage 3 to an area they are interested in finding employment in; Civil Service, Housing, Primary Teaching, or dependant on obtaining a good classification of Degree go on to further Studies e.g. Masters in a range of disciplines.

This programme has been designed to equip Students with the skills and knowledge base required to work in their chosen specialism or other graduate opportunities. It is also a platform from which Students can undertake additional vocational and academic qualifications.

This Programme Quality handbook contains important information including:

- The approved programme specification
- Module records

Note: the information in this handbook should be read in conjunction with the current edition of the College / University Student handbook which contains student support based information on issues such as finance and studying at HE along with the University's Student Handbook <https://www.plymouth.ac.uk/your-university/governance/student-handbook> and your Teaching, Learning and Assessment Handbook available on your programme virtual learning environment.

PS5. Programme Aims

This Programme aims to provide students who are resident in Jersey with an opportunity to undertake and study a range of Stage 3 modules in the Social Sciences offered in Jersey. It is intended:

1. to stimulate students to synthesise, analyse, critically evaluate and apply ideas, concepts, and methods grounded in the social sciences to a variety of contemporary domestic and international issues and problems in the Jersey context;
2. to develop a range of intellectual and research skills, including critical thinking skills, writing and oral skills, interpersonal and group skills, and independent working skills, all of which will have relevance for a variety of employment opportunities; and
3. to encourage methods of learning and working that help prepare students to be life-long learners able to accept responsibility for their own personal and professional development and to play a co-operative and socially responsible role in society.

PS6. Programme Intended Learning Outcomes (ILO)

By the end of this programme the student will be able to:

On completing this Stage 3 only Programme graduates will be able to:

1. synthesise, analyse and critically evaluate ideas, concepts, and methods grounded in the social sciences in a creative way, so as to gather a systematic understanding of a variety of contemporary domestic and international issues and problems in the Jersey context;
2. apply analytical and critical thinking to, and make critical judgements about, the identification and/or solutions to a contemporary domestic and international issues and problems in the Jersey context based on the conduct independent research;
3. make appropriate use of information technology for the retrieval, analysis and presentation of information, thereby being able to communicate ideas and information clearly and effectively in a variety of forms;
4. manage their own learning, increase their independence as reflective learners, and use feedback effectively; and,
5. collaborate effectively with others in the pursuit of common objectives.

PS7. Distinctive Features

This Programme has been designed to permit the continued provision in Jersey of an entire Honours Degree that builds upon the Dip HE provision by Highlands College, the programme is validated by University of Plymouth (Academic partnerships). The Students benefit from small groups, close proximity to Tutors and are able to access student support services provided by Highlands College. Its content enables students to apply a range of social science perspectives (political economy, social psychology, sociology, criminology) to both explore a range of domestic policy and international political economy and governance issues that are germane to Jersey's future in a globalising world and on the fringe of Europe. Students are able to undertake their work-based action research with local organisations e.g. States of Jersey Police and Probation Services, Government of Jersey Offices, Schools, and Charities. There are full historical resources at the Jersey Archive, which have proved useful for Students wishing to undertake a locally based dissertation.

PS10. Academic Standards and Quality Enhancement

The Programme Leader/Manager (or other descriptor) leads the Programme Committee in the following of University of Plymouth's annual programme monitoring process (APM), as titled at the time of approval. APM culminates in the production, maintenance and employment of a programme level Action Plan, which evidences appropriate management of the programme in terms of quality and standards. Any formally agreed change to this process will continue to be followed by the Programme Leader/Manager (or other descriptor) and their Programme Committee.

Elements of this process include engaging with stakeholders. For this definitive document it is important to define:

Subject External Examiner(s):

The list below indicates the modules allocated to the external examiner, Dr Rachel Monaghan for this titled programme.

Social Science

HIGH3026 Contemporary Social Issues:

Policing the Private Sphere

HIGH3036 Psychology and Society

HIGH3037 Immigration, Race and Labour

SSJ3002 Work-based Action Research

SSJ3001 Social Science Dissertation

Additional stakeholders specific to this programme:

Students are engaged with through a range of processes to ensure the standards and quality of the programme. These include formal Programme Committee meetings, the Periodic Review, meetings with the External Examiners, feedback gained through the University SPQ process, Module Evaluation questionnaires, and individual academic tutorials, through the class representatives and through informal discussion with students.

Graduates are involved through development of an Alumni Organisation, focus groups and by individual meetings or contacts through e-mail and social media.

Organisations are also engaged through a number of different processes. These include focus groups, individual organisation feedback is gathered when the Work-based Learning tutor visits students in placement. Interviews and discussion are held with a network of senior managers in a range of organisations. Contacts are also made with Skills Jersey, the Chamber of Commerce and a range of organisations through tutors' personal contacts.

PS12. Explanation and Mapping of Learning Outcomes, Teaching & Learning and Assessment⁶

⁵ The provided table includes only a single line. This should be multiplied by copying and pasting to produce the correct number of modules for the level of the programme. For ease of consideration and clarity, please include a separate table for each level by again copying and pasting this table. Colour coding/ shading may be used to differentiate between new modules and existing approved modules shared with other programmes.

⁶ For programmes containing more than one FHEQ level of study, i.e. a bachelor programme with levels 4, 5 & 6, a separate map must be provided for each level. The table should be copied and pasted to enable this.

Developing graduate attributes and skills, at any level of HE, is dependent on the clarity of strategies and methods for identifying the attributes and skills relevant to the programme and where and how these are operationalized. The interrelated factors of Teaching, Learning and Assessment and how these are inclusive in nature, are fundamentally significant to these strategies and methods, as are where and how these are specifically distributed within the programme. Ordered by graduate attributes and skills, the following table provides a map of the above, plus an exposition to describe and explain the ideas and strategy of each. Therefore, subsequent to the initial completion for approval, maintenance of this table as and when programme structure changes occur is also important:

PS13. Work Based/Related Learning⁷

WBL is an essential element of Foundation Degrees and therefore needs to be detailed here. However, for all types of HE programmes there should be an element of employability focus through, at least, Work Related Learning, and therefore the following is applicable for all:

FHEQ level: 6					
WBL/WRL Activity:	Logistics	Prog Aim	Prog Intended LO	Range of Assessments	Related Core Module(s)
The Work Related Activity is related to several modules where academic theory is related to work practices and case studies. Students must undertake an Honours project and consultancy-type project. This is directly related to employment. Guest speakers from industry and part-time tutoring staff add to work related learning, as does attendance at CPD seminars.	Modules delivered, Research Project Guest speakers from industry and part-time tutoring staff Assessments undertaken CPD events attended	A2, A3,	ILO3, ILO4, ILO5	Research projects Coursework Examinations Reports Seminar work Presentations	SSJ3001 Social Science Dissertation SSJ3002 Work-based Action Research HIGH3036 Psychology and Society
<p>An explanation of this map: As an industry focused degree following on from a foundation degree with extensive WBL, much of the teaching is related to putting theory into practice focused on the local context and comparing to the UK and international contexts. More research is carried by students</p>					

⁷ The provided table includes only a single line. This will need replicating for each WBL/WRL activity (I.e, placements / real-world industry provided problems to solve / visits / trade shows etc.). Additionally, the table should be replicated for each stage of the programme for clarity.

with facilitation of knowledge replacing structured teaching to ensure students have an appropriate graduate skill set to take into employment.

Summary of Module Content (max 2000 characters)

This module aims to provide students with an understanding of the complex problems surrounding the 'policing' of actions which take place within the private sphere. As such it draws on a number of disciplines including social policy, sociology, criminology, politics, economics and international relations. It will concentrate on three aspects of modern life – illegal drug use; alcohol and food intake and intra-familial violence – to demonstrate that whilst these areas are problematic and cost nation states billions in terms of trying to deal with the consequences of these actions, the fact that these actions take place within the private sphere limits the range and scope of polices available. The module will be broken into two sections. Term 1 deals exclusively with illicit drug use and looks at this through three lenses: international, national and individual. Term 2 then moves to look at alcohol and lifestyle choices and family life and violence and abuse within the family.

Summary of Module Content

This module provides Level-6 psychology content; the module gives an understanding of the nature and practice of applied psychology. Students will learn how generic psychological concepts, techniques and theory complement fields such as crime, health, education, sport, business and the environment. The interplay between domain-specific knowledge and psychological insight will be illustrated by reference to contemporary societal issues relevant to each discipline. For example, within education, students will learn the contribution of psychology to our understanding of disruptive behaviour; within health, they will learn the psychological dimensions of substance abuse.

Assessment for the module will be by way of an essay, a seminar and thematic report. The seminar and report will evaluate students' understanding of applied psychological practice and will relate to issues such as professional competence and judgment as well as the ethical and logistical challenges of applying psychological method and theory within non-psychological professions. This part of the module will be supported by content from established, applied-psychology practitioners.

Summary of Module Content (max 2000 characters)

This module aims to equip students with the skills and confidence to become active and accomplished researchers within the workplace. As such, it is based on the belief that student best learn research by 'doing' real-world work. It asks students to find a relevant organisation and to offer their research skills in a consultancy role by undertaking a small piece of action research. By engaging with the organisation, under the guidance of a mentor from the organisation and the module leader, the students learn negotiation skills, how to interact in a professional manner, working within externally imposed time constraints and the importance of meeting deadlines. In addition, the students put into practice research theories and skills learnt in the previous two stages. The module is delivered via a mix of formal lecture sessions and intensive one-to-one tutorials. On completion, students will have demonstrated that they can plan, execute and present a coherent and professional piece of research

MODULE AIMS:

Globalization of the economy and of culture is implicated in the migration process in complex and, often, un-examined ways. This module aims to view mounting global-local inequalities and how they exacerbate processes of exclusion. Moreover, how some are more likely to be excluded from their means of livelihood, from material goods that imply socio-economic standing, from the higher ranks of citizenship hierarchies and the rights that they confer upon its citizens--whether at home or abroad. Explore how they are excluded, and clustered around class, ethnic, racial, and gender backgrounds.

Summary of Module Content

This module offers a more in-depth study into migration and its relationship with race and labour during the modern period. It includes historical contextualisation and the evolution of migration before 1945, before moving onto current patterns in migration in the post-war world. The second half of the module will cover materials including Migration, Security and the Debate on Climate Change, Migrants and Minorities in the Labour Force, New Ethnic Minorities and Society, Immigration and Politics and Migration in the 21st Century. These themes are placed along-side current issues and problems surrounding migration and labour within a context of globalisation and the current migrant crisis in Europe and North America.
