<p>Summary of Module Content (max 2000 characters)</p> <p><i>This module aims to provide students with an understanding of the complex problems surrounding the ‘policing’ of actions which take place within the private sphere. As such it draws on a number of disciplines including social policy, sociology, criminology, politics, economics and international relations. It will concentrate on three aspects of modern life – illegal drug use; alcohol and food intake and intra-familial violence – to demonstrate that whilst these areas are problematic and cost nation states billions in terms of trying to deal with the consequences of these actions, the fact that these actions take place within the private sphere limits the range and scope of polices available. The module will be broken into two sections. Term 1 deals exclusively with illicit drug use and looks at this through three lenses: international, national and individual. Term 2 then moves to look at alcohol and lifestyle choices and family life and violence and abuse within the family.</i></p>

Summary of Module Content

This module provides Level-6 psychology content; the module gives an understanding of the nature and practice of applied psychology. Students will learn how generic psychological concepts, techniques and theory complement fields such as crime, health, education, sport, business and the environment. The interplay between domain-specific knowledge and psychological insight will be illustrated by reference to contemporary societal issues relevant to each discipline. For example, within education, students will learn the contribution of psychology to our understanding of disruptive behaviour; within health, they will learn the psychological dimensions of substance abuse.

Assessment for the module will be by way of an essay, a seminar and thematic report. The seminar and report will evaluate students' understanding of applied psychological practice and will relate to issues such as professional competence and judgment as well as the ethical and logistical challenges of applying psychological method and theory within non-psychological professions. This part of the module will be supported by content from established, applied-psychology practitioners.

Summary of Module Content (max 2000 characters)

This module aims to equip students with the skills and confidence to become active and accomplished researchers within the workplace. As such, it is based on the belief that student best learn research by 'doing' real-world work. It asks students to find a relevant organisation and to offer their research skills in a consultancy role by undertaking a small piece of action research. By engaging with the organisation, under the guidance of a mentor from the organisation and the module leader, in this manner the students learn negotiation skills, how to interact in a professional manner, working within externally imposed time constraints and the importance of meeting deadlines set by others. In addition, the students are allowed to put into practice research theories and skills learnt in the previous two stages. The module is delivered via a mix of formal lecture sessions and intensive one-to-one tutorials. On completion, students will have demonstrated that they can plan, execute and present a coherent and professional piece of research

Globalization of the economy and of culture is implicated in the migration process in complex and, often, un-examined ways. This module aims to view mounting global-local inequalities and how they exacerbate processes of exclusion. Moreover, how some are more likely to be excluded from their means of livelihood, from material goods that imply socio-economic standing, from the higher ranks of citizenship hierarchies and the rights that they confer upon its citizens--whether at home or abroad. Explore how they are excluded, and clustered around class, ethnic, racial, and gender backgrounds.

Summary of Module Content

This module offers a more in-depth study into migration and its relationship with race and labour during the modern period. It includes historical contextualisation and the evolution of migration before 1945, before moving onto current patterns in migration in the post-war world. The second half of the module will cover materials including Migration, Security and the Debate on Climate Change, Migrants and Minorities in the Labour Force, New Ethnic Minorities and Society, Immigration and Politics and Migration in the 21st Century. These themes are placed along-side current issues and problems surrounding migration and labour within a context of globalisation and the current migrant crisis in Europe and North America.
